## CAREER OBJECTIVE

---

Final-year Computer Science student with hands-on experience in full-stack web development using the MERN stack and Java. Currently started freelancing while also having built and deployed real-world web applications through an industry internship. Looking for a full-stack developer role where I can apply my skills, grow as a developer, and contribute to impactful projects.

## WORK EXPERIENCE

---

### MERN Stack Developer Intern

Jan 2026 – May 2026

*Bit-7 Informatics, Bhopal*

- Developed and delivered a full-stack e-commerce website (Tribe Roots) using the MERN stack for a real client.
- Built responsive and user-friendly interfaces using React.js, HTML, CSS, and JavaScript.
- Designed and integrated REST APIs with Node.js and Express.js for seamless data management.
- Managed database operations using MongoDB, including product, user, and order management.
- Integrated Cloudinary for persistent image storage and Razorpay for payment processing.
- Deployed the application on Vercel (frontend/admin) and Render (backend) with a custom domain.

### Java Intern

Jun 2025 – Jul 2025

*Technest, Virtual*

- Developed Java-based applications applying OOP concepts and industry-standard coding practices.
- Built a Chat Application implementing real-time communication using client-server architecture.
- Developed a Bank Management System to handle customer accounts and banking operations.
- Collaborated with senior developers to understand project workflows and improve code quality.

## PROJECTS

---

### 3D Portfolio Avatar | *Three.js, JavaScript, HTML, CSS* | [Live](#)

- Built an interactive 3D low-poly head avatar for personal portfolio using Three.js with WebGL rendering.
- Implemented drag-to-rotate, wireframe toggle, and background theme cycling for an engaging user experience.
- Designed to closely resemble personal appearance with custom geometry and lighting setup.
- Exported as a standalone HTML file and also as a reusable React component for portfolio integration.

### ShieldBlock | *React, Vite, Node.js, Express.js, CSS, React Router* | [GitHub](#)

- Built a DNS-level ad blocker web application as a minor project in collaboration with a teammate.
- Designed and developed the entire frontend using React and Vite with a dark theme and green accent design system.
- Implemented multi-page navigation using React Router covering pages like Home, Signup, Onboarding, and Dashboard.
- Built a multi-step signup flow and a 5-step onboarding wizard for smooth user onboarding experience.
- Created an interactive user dashboard to display ad-blocking stats and activity for the user.
- Structured the project with a per-component folder architecture and coordinated backend integration with a teammate.

### Tribe Roots | *React, Vite, Node.js, Express.js, MongoDB, Cloudinary, Razorpay* | [GitHub](#) | [Live](#)

- Developed a full-stack e-commerce platform for tribal and organic products with three separate apps: customer frontend, admin panel, and Node.js/Express backend.
- Integrated Cloudinary for persistent image uploads, replacing local storage to support production deployment.
- Implemented Razorpay payment gateway for secure online transactions.
- Deployed the frontend and admin panel on Vercel, backend on Render, and connected a custom domain (triberoots.in).
- Configured CORS for cross-origin communication and set up UptimeRobot to prevent Render free-tier cold starts.
- Resolved multiple production issues including MongoDB env loading order, Linux case-sensitivity bugs, and SPA routing via vercel.json.

|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>Java Course – Apna College, Virtual</b>                                                                                                                                                                                                                                          | Jun 2025 – Feb 2026 |
| <ul style="list-style-type: none"><li>• Covered Core Java fundamentals, OOP concepts, exception handling, collections, file handling, and multithreading.</li><li>• Gained strong knowledge of Data Structures and Algorithms through hands-on problem-solving exercises.</li></ul> |                     |

## TECHNICAL SKILLS

---

**Languages:** Java, JavaScript, HTML, CSS  
**Frontend:** React.js, JSX, Vite, React Router, Three.js  
**Backend:** Node.js, Express.js, REST APIs  
**Database:** MongoDB  
**Tools & Platforms:** Git, GitHub, Vercel, Render, Cloudinary, Razorpay, UptimeRobot

## EXTRA CURRICULAR ACTIVITIES

---

**Painting** – Winner of multiple prizes in art competitions.  
**Cricket** – Represented college in inter-college tournaments.  
**Photography & Cinematography Club (SATI)** – Active member.
